

SPATIAL ON DEMAND™
get global imagery now

Mark the Spot

In the oil and gas industry, every company makes budgets, deadlines, missions, and sometimes, mistakes. While trying to mark the spot with specialized imagery, companies miss their mark with duplicated efforts, redundant purchases, spending and human resource inefficiencies, and technology snafus. Everyone makes mistakes.

Don't Be Everyone

Avoiding mistakes and getting the best imagery expertise in the business is why four out of the top five oil and gas corporations in the Fortune 100, and twenty leading energy companies, trust Spatial On Demand to manage their visual data and protect their image investments. It's why Spatial Energy is the preferred global energy partner for DigitalGlobe, GeoEye, SPOT in assessing, selecting and managing new and existing geospatial data sets.

With the most comprehensive set of imagery solutions available, our clients can get down to business, instead of wasting their time, talent, and money. Focus on your core business; improve land lease negotiation results; cut in-house hassles; store and share data reliably and safely.

Accelerate Production

Our clients tell us reasons they benefit from using the Spatial on Demand Hosting Service includes:

- **Fast Image Access.** 3 to 5 second image access time versus 20 to 50 seconds with guaranteed direct to the desktop availability, backup and security.
- **Rapid Implementation.** In 24 hours users receive streaming imagery data to their preferred desktop application without software installation and training.
- **Lower Cost.** No investment in hardware, software or management and use the tools you already have.
- **Secure and Redundant.** Fully redundant and secure systems across multiple geographies with OC-3 Fiber for fast bandwidth. ISO-9001 Certified.

How to Buy

Sold as an annual subscription, Spatial On Demand provides your users access to the portal, streaming services and image storage of existing images and new investments. Spatial On Demand also provides unlimited access to the public layers in the Spatial Energy database.

Power in Partnerships

As the preferred provider of imagery solutions to the oil and gas industry, Spatial Energy spans the best of the best, including:
